

MGT723 Research Project

Assessment Task 2: Data Collection

Your assigned research question*:

Title:

Acknowledgement:

I certify that I have carefully reviewed the university's academic misconduct policy. I understand that the source of ideas must be referenced and that quotation marks and a reference are required when directly quoting anyone else's words.

Unless otherwise approved by the course coordinator, all students will be considering the general issue of the Voluntary Disclosure of Environmental Performance. In Week 1 Students will be assigned to a specific research problem.

Introduction: (Not assessed)

What is your research problem?

Literature Review – Summary (Not Assessed)

Provide your summary (maximum 1 page) of the theoretical argument leading to the conceptual model with theoretical constructs clearly identified.

Conceptual Model: (Not Assessed)

Provide a diagram to show the relationships between the key theoretical constructs.

Hypotheses: (Not assessed)

Indicate your hypotheses – they will be assessed in your Assessment Task 1 for ACC620.

Data Collection (Assessed)

Complete the spreadsheet and submit it separately.

Data Analysis - Descriptive: (Assessed)

Provide a descriptive analysis of the relevant data from the CDP dataset provided. Maximum of five pages.

Data Analysis - Inferential: (Assessed)

Describe the inferential statistics that you plan to use to test your hypotheses.
